Experience:

Mr. Savka has been employed with Triad Associates, Inc. since 1982. He is on the Board of Directors and is vice-president and secretary/treasurer of the Corporation. His current responsibilities include corporate administration, marketing, public relations, client and project development, as well as project management. Mr. Savka serves as client and project liaison from initial marketing through development and implementation of projects. His work includes pre-project planning, scoping and contract negotiation.

Prior to his current role with the firm, Mr. Savka served as a Project Manager within the construction division of Triad Associates, Inc. from 1982 through 1993. Responsibilities included project estimating, bidding, purchasing, scheduling, and construction supervision. He has been involved with projects ranging from small retrofits and rehabs to new installations and expansions up to \$10 million dollars. He also spent considerable time in charge of field operations and direct project supervision.

Additionally, he has project management experience within the engineering division of the company. Responsibilities include project planning, implementation, specification writing, preparation of itemized take-offs, estimating, construction engineering, and inspection. Project experience includes downtown revitalization coordination and planning, architectural administration, water and wastewater, as well as residential and commercial building.

Project development, planning, and project management efforts include new water and wastewater treatment facilities, water tower and water main installations, fire station projects, building construction and renovation projects as well as revitalization planning and implementation.

Mr. Savka's more recent project experience includes various water projects for the Towns of Ingalls, Upland, Poseyville, Arcadia, Schneider, and Walton; various wastewater projects in Upland, Kempton, Elwood, and Schneider; building projects in Ligonier, Ingalls, and Wabash Township.
